

Mountain-climbing and via ferrata hiking helmet

RANGE OF USE

Helmet for climbing, caving, canyoning and via ferrata

Do not use this product for activities for which it is not intended.

Use of a helmet can significantly reduce the risks associated with activities at heights, but cannot completely eliminate them.

During larger impact, the helmet deforms to absorb the greatest possible amount of energy.

Sometimes it will deform so much that it will be totally destroyed. Deformation may be such that the helmet cannot be used anymore.

WARNING

Activities associated with the use of helmets are dangerous. You are responsible for your own actions.

Before using the helmet it is necessary to:

- Read the instructions for use.
- Practice the correct use of the product.
- Familiarize yourself with the product's capabilities and limitations of its use.
- Understand the risks associated with its use.

Omission or breach of any of these rules may result in serious injury or death.

DESCRIPTION

(1) Shell, (2) Adjusting wheel (3) Chin strap (4) Fastening buckle (5) Chin strap clip (6) Clip for attaching lights, (7) Ventilation holes.

Materials: ABS shell (acrylonitrile butadiene styrene), polyurethane cushioning and polystyrene foam, polyester straps.

INSPECTION

Before each use, make sure that the inner and outer shell does not show any cracks or deformation and that the straps and headband stitching is not damaged. Check the size settings system, particularly the chin strap buckle.

WARNING

A hard impact may irrevocably damage the helmet without leaving visible signs of damage.

Following big impact, discontinue use of the helmet.

If you have any doubts about the state of the product, please contact Rock Empire, Ltd., or discard the product from use.

SETUP AND WEAR

Preparation: Use the adjusting wheel (2) to expand the circumference of the helmet.

Settings: Put the helmet on your head and, using the adjustment wheel (2), tighten the perimeter to head size. Pull the chin strap clip (5) under the ear. It can also be set forward or backward, according to user needs.

Fastening: Slide the two parts of the clamping straps (4) into each other until the hooks engage. Tighten the chin strap firmly, but comfortably. Proper tightening ensures that there is no slippage of the helmet. To unfasten the chin strap, press the buckles on both sides (4)

Check: Always check proper fastening of buckle (4) by pulling the straps. During use, make sure that the helmet was properly set, because only then can it provide maximum protection.

TRANSPORT, STORAGE AND MAINTENANCE

Wrap helmet so that it is not affected by any pressure or sharp edges

Store helmet away from UV rays, moisture, chemicals, solvents, etc.

Do not expose the helmet to high temperatures, such as in direct sunlight in a vehicle.

Paints, stickers and other similar applications may adversely affect the safety of the helmet.

Alterations: Avoid any alteration of the helmet design, as well as the additional installation of accessories, etc.

The only exception is the installation of a headlamp with a clip (6)

Cleaning: The helmet can be cleaned with lukewarm water and ordinary soap, never use solvents or other chemicals. Do not wash and dry the helmet in a washing machine.

The helmet comes in a polythene bag and paper carton.

GENERAL INFORMATION

Life and inspections

The life of plastic products is **10 + 5 years** (5 years of storage in compliance with the instructions, 10 years from the first use). If the authorised person establishes that the product is not suitable for further safe use it is competent to recommend discontinuation of further use of the product even before elapse of its lifespan.

Metal and plastic products must be checked **at least once in 12 months** by the manufacturer or a person authorised for inspections of PPE of category III and simple structure (hereinafter “authorised person”) such as IRATA and SPART LEVEL 3 etc. These inspections should also be performed in the case of emergencies (fall, aggressive chemical environment, mechanical damage or doubt of the user).

Once you have any doubts about the state of helmet, discard it and turn it in for disposal.

Product aging: There are many reasons to consider the product as outdated. For example, changes in the laws and regulations, development of new technologies, incompatibility with other equipment components, etc.

Warranty

The MANUFACTURER provides a guarantee of 3 years for defects of material and workmanship.

The guarantee does not relate to defects caused by normal wear and tear, negligence, unprofessional handling, improper use, prohibited adjustments and poor storage.

Accidents, damages, negligence and use for which the helmet is not designated are not covered by this guarantee.

The MANUFACTURER is not liable for direct, indirect or accidental damages in connection with the use of our products or as a consequence thereof.
